Objective

I am Junior Web Developer with 2 years of experience in the Technology domain, who is proficient in JavaScript and PHP development. I am experienced in building websites, working with databases and site architecture which has made me well-versed in numerous programming languages including PHP, JavaScript, and SQL. I am excited to bring my skills and experience to a dynamic, forward-thinking company where I can drive meaningful impact.

Work Experience

Lake Creations

06/2022 - 11/2022

Web developer

Collaborated with senior Web developer to design the company's website.

Resolved company's website issues based on external reports

Revamped the company's blog with website modernization efforts to create a better overall user experience and incorporated SEO optimization thereby increasing blog visits from unique users.

Early Code

02/2022 - 06/2022

PHP developer intern

Collaborated with a team in developing a finance website where users can create an account, deposit money, withdraw and transfer to other users using Web technologies like PHP, JavaScript and MySQL.

Developed frontend Web application projects using HTML5, CSS3, Javascript and CSS libraries such as Bootstrap and Tailwind.

Learnt how to use SASS for CSS development.

Built an online bookstore where users can shop for books, add them to a card and make payment online making of HTML5, CSS and javascript for the client side and PHP and MySql for the server side.

Projects

Early Money

Finance website

A responsive finance website which can be used to perform on-the-go financing transactions such as creating an account, login, deposits, withdrawals and transfers.

Designed the website with Web technologies such as HTML5, CSS3 and bootstrap to give it an appealing and responsive user interface.

Programmed the server-side logic using PHP, and deployed MYSQL for the database.

Fixed specific issues and bugs on the website.

Awesome Quiz
Responsive Quiz Application

A online quiz application which allows users to take test questions within a stipulated time and displays the scores after the test.

Designed the user interface using HTML5 and CSS3.

JavaScript programming language was used to build the logic side.

Scientific Calculator App
Calculator

A responsive scientific calculator application which can perform simple and complex mathematical operations.

The user interface was designed using HTML5 and Bootstrap.

JavaScript logical operators and extensive use of DOM was used to programme the logic functions of the calculator.

Portfolio
Portfolio website

Built and designed my portfolio website using html, Css and JavaScript for responsiveness. I also added Web icons from font awesome to beautify the website.
